APRIL 24 | HOTEL ZAZA MEMORIAL CITY

CONFERENCE PROGRAM

8:00am – 9:00am Registration & Breakfast

9:00am – 9:45am Welcome & Keynote

Chris Joseph, CEO of Enablon & eVision, will discuss our vision and strategy to address the market trends that are fundamentally changing EHS and Operational Risk management. The session will highlight the impact of Industry 4.0 technology, and Enablon and eVision's capabilities and initiatives to enhance customer success.

Speaker: *Chris Joseph, CEO, Enablon & eVision*

9:45am – 10:30am Enablon Product Strategy & Vision

Hear about Enablon's most recent roadmap releases and experience the industry leading functionalities of our Health & Safety and Compliance solutions. See how the Enablon platform is deploying mobile solutions, AI, predictive analytics, and integrating with IOT devices to take the industry to the next level. This session will also showcase the first integrations between the industry leading Enablon & eVision solutions for operational efficiency, safety and risk management.

Speakers:

David Rocha, Senior Product Manager, Safe Operations and Fit for Work, Wolters Kluwer | Enablon
Michel Tol, Product Marketing Manager, eVision Software
Taylor Allis, Vice President of Product, Wolters Kluwer | Enablon

10:30am – 10:45am Refreshment Break

10:45am – 11:30am Closing the Gap: EHS and Operational Excellence

Operational excellence is closely tied to quality and EHS performance. When EHS and operations are fully aligned, new levels of company efficiency and safety performance can be achieved. In this session, you will hear the importance of tying your operational processes to your EHS programs to reduce risk, increase safety, and deliver efficiencies.

Moderator:

James Jensen, Director Customer Success, Wolters Kluwer | Enablon

Panelists:

Beth Purcell, Technology Business Partner – Operations Services, Colonial Pipeline
Hugo Ashkar, Risk Manager, Global Projects Organization, BP
Nedra Kelly, Operations Advisor – Upstream Operations, ExxonMobil

11:30am – 12:00pm The Positive Effects of an Efficient Chemical Data Management Strategy throughout your EHS and Product Compliance Landscape

Air Emissions, Waste Management, Exposure Monitoring, Environmental Spills, Risk Assessments and Permits all make use of chemical data in one way or another. Unfortunately, chemical data is often included in these processes through entering data by hand, making an assumption or, in some cases, not considering the chemical data at all. Whether that chemical data is up-to-date and accurate is a completely different story. This session lays out chemical data management basics, moving from a reactive to a proactive strategy and the possibilities of using quality chemical data throughout your EHS program.

Speaker: Matt Adams, Manager – Strategic Initiatives, SiteHawk

12:00pm – 1:15pm Lunch

1:15pm – 4:45pm Breakout Sessions

	EVISION <i>Room: Advice & Counsel</i>	ENABLON <i>Room: Great Expectations Ballroom</i>
1:15pm – 2:15pm	PERMIT TO WORK AND SHIFT MANAGEMENT PRODUCT DEMO & ROADMAP	ENABLON PLATFORM PRODUCT DEMO

3:00pm – 3:30pm	NETWORKING BREAK	
3:30pm – 4:15pm	DYNAMIC BARRIER MANAGEMENT PRODUCT DEMO & ROADMAP	ENABLON PLATFORM PRODUCT ROADMAP

4:15pm – 5:00pm From Data Integration Straight to Reporting: The Fully Automated Solution that Everyone Needs.

The environmental application includes a robust integration module, a flexible data validation engine, and data mapping directly into environmental parameters. The Enablon user interface is both saturated with time-saving forms to streamline push-button processing and ripe for full automation. Jacobs will demonstrate through simple use cases how a few key advanced configuration elements can be introduced to enable the fully-automated solution. This includes automating validation and calculation stages within the Environmental application to produce hands-free reporting. Automation within Enablon paired with modern integrations that streams in live facility data can yield a self-sustaining environmental dataset to both ease the burden of regulatory reporting and enable the next generation of performance analytics.

Speakers:

Brian Stenson, Client Relations, Jacobs

Tom Battenhouse, Senior Consultant - EHS Information Management Practice, Jacobs

5:00pm – 5:15pm Closing Remarks

5:15pm – 7:00pm Cocktail Reception
